BCL6 antibody [LN22]

Cat. No. GTX01937

Host	Mouse
Clonality	Monoclonal
Isotype	IgG2b
Applications	IHC-P
Reactivity	Human

Package
500 µl

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
IHC-P	1:60

Note : Heat Induced Epitope Retreival (HIER) was performed in Epitope Retrieval Solution pH 9. The use of H_2O_2 to block endogenous peroxidase has a detrimental effect on the epitope recognized by this antibody. Solutions containing 1% or greater H_2O_2 can dramatically reduce the level of staining achievable. Blocking after unmasking can also lead to negative results. Therefore, it is recommended that endogenous peroxidase should be blocked before unmasking with 0.5% H_2O_2/methanol for 10 minutes. If this recommendation is not followed, staining intensity may be reduced.

Not tested in other applications.

Properties

Form	Liquid
Buffer	Tissue culture supernatant
Preservative	0.09% Sodium azide
Storage	Store as concentrated solution. Centrifuge briefly prior to opening vial. Store at 4ºC. DO NOT FREEZE.
Immunogen	Prokaryotic recombinant protein corresponding to 1–350 amino acids of the N-terminus of the Bcl-6 human oncoprotein molecule.
Purification	Unpurified
Conjugation	Unconjugated
Note	For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption. Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
