

Her2 / ErbB2 antibody

Cat. No. GTX100509

Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Applications	WB, IHC-P
Reactivity	Human

Package

100 µl, 25 µl

PRODUCT

Summary

HER2 antibody recognizes HER2 protein, also known as proto-oncogene Neu or ERBB2 (predicted molecular weight of 138 kDa). HER2 is a member of the human epidermal growth factor receptor (EGFR) family of receptor tyrosine kinases. It shares 50% sequence identity with EGFR protein, but involves different signaling pathways. HER2 can heterodimerize with EGFR protein or homodimerize when it is present in high concentrations.

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
WB	1:500-1:20000
IHC-P	1:100-1:1000

Not tested in other applications.

Calculated MW 138 kDa. ([Note](#))

Properties

Form	Liquid
Buffer	PBS, 1% BSA, 20% Glycerol
Preservative	0.01% Thimerosal
Storage	Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Concentration	0.07 mg/ml (Please refer to the vial label for the specific concentration.)
Immunogen	Recombinant protein encompassing a sequence within the Intracellular domain of human Her2 / ErbB2. The exact sequence is proprietary.
Purification	Purified by antigen-affinity chromatography.
Conjugation	Unconjugated

DATA IMAGES

GTx100509 IHC-P Image

Her2 / ErbB2 antibody detects Her2 / ErbB2 protein at cell membrane by immunohistochemical analysis.

Sample: Paraffin-embedded human breast carcinoma.

Green: Her2 / ErbB2 stained by Her2 / ErbB2 antibody (GTx100509) diluted at 1:50.

GTx100509 WB Image

Wild-type (WT) and Her2 / ErbB2 knockout (KO) HeLa cell extracts (30 µg) were separated by 5% SDS-PAGE, and the membrane was blotted with Her2 / ErbB2 antibody (GTx100509) diluted at 1:5000. The HRP-conjugated anti-rabbit IgG antibody (GTx213110-01) was used to detect the primary antibody, and the signal was developed with Trident femto Western HRP Substrate.

GTx100509 IHC-P Image

Her2 / ErbB2 antibody [C2C3], C-term detects Her2 / ErbB2 protein at cell membrane in human breast carcinoma by immunohistochemical analysis.

Sample: Strong positive (++) , low positive (+) and negative tissue slides cores assessed using Quantitative Digital Pathology.

Her2 / ErbB2 antibody [C2C3], C-term (GTx100509) diluted at 1:500, and competitor's antibody (CST#4290) diluted at 1:100.

Antigen Retrieval: Trilogy™ (EDTA based, pH 8.0) buffer, 15min

GTx100509 WB Image

Various whole cell extracts (30 µg) were separated by 7.5% SDS-PAGE, and the membrane was blotted with Her2 / ErbB2 antibody (GTx100509) diluted at 1:1000. The HRP-conjugated anti-rabbit IgG antibody (GTx213110-01) was used to detect the primary antibody. Corresponding RNA expression data for the same cell lines are based on Human Protein Atlas program.
