Various whole cell extracts (30 µg) were separated by 5% SDS-PAGE, and the membrane was blotted with VEGF Receptor 3 antibody (GTX100807) diluted at 1:1000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody. Corresponding RNA expression data for the same cell lines are based on Human Protein Atlas program.
