## PRODUCT

## Summary

Beta-catenin antibody recognizes beta-catenin protein, which acts as a cell adhesion factor as well as an effector of Wnt signaling pathway-driven transcription. Mutation or dysregulation of beta-catenin is associated with many diseases, including developmental disorders and cancers. There are a plethora of commercially available beta-catenin antibodies, among which GeneTex's beta-catenin antibody (GTX101435) is one of the most rigorously validated and widely cited for a number of applications.

**GTX101435 WB Image**

Wild-type (WT) and beta Catenin knockout (KO) 293T cell extracts (9 µg) were separated by 7.5% SDS-PAGE, and the membrane was blotted with beta Catenin antibody [N1N2-2], N-term (GTX101435) diluted at 1:1000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody.
