Various whole cell extracts (30 µg) were separated by 15% SDS-PAGE, and the membrane was blotted with Hemoglobin gamma G antibody (GTX109601) diluted at 1:500. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody. Corresponding RNA expression data for the same cell lines are based on Human Protein Atlas program.
