PRODUCT

Summary

beta-Actin antibody detects beta-actin, a cytoskeletal protein with a predicted molecular weight of 42 kDa. Because of its widespread expression, beta-actin is commonly used as a loading control for various protein assays, particularly western blots, to estimate sample protein amount and quality.

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
WB	1:500-1:20000
ICC/IF	1:100-1:1000
IHC-P	1:100-1:1000
IHC-Fr	Assay dependent
IP	Assay dependent

Not tested in other applications.
