PRODUCT

Summary

Caspase 3 antibody detects caspase 3 protein, a 32 kDa zymogen (also known as pro-caspase 3) that is cleaved at conserved aspartic residues into 17 kDa and 12 kDa subunits upon activation. The cleaved subunits then form an active heterotetramer by hydrophobic interactions and trigger subsequent caspase cascades to induce the apoptotic phenotype.

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution

Wild-type (WT) and Caspase 3 knockout (KO) HeLa cell extracts (30 μ g) were separated by 12% SDS-PAGE, and the membrane was blotted with Caspase 3 antibody (GTX110543) diluted at 1:5000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody.
