Various whole cell extracts (30 µg) were separated by 15% SDS-PAGE, and the membrane was blotted with Glucagon antibody [N1C3-2] (GTX112806) diluted at 1:1000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody. Corresponding RNA expression data are based on Human Protein Atlas program.
