Product Note

The 25-D1.16 monoclonal antibody reacts with mouse MHC class I H-2Kb bound to the ovalbumin-derived peptide with sequence SIINFEKL. This antibody does not react with unbound MHC class I H-2Kb or MHC class I H-2Kb bound to an irrelevant peptide. The 25-D1.16 antibody is often used to track the quantity and localization of antigen-presenting cells bearing these specific molecules in vivo.
