Applications

Application Note

We recommend the following starting dilutions: For ELISA: Use at a concentration of 6.25 ng/ml. For WB: Use at a dilution of 1:2000. Optimal dilutions should be determined experimentally by the end user.

Calculated MW 27 kDa. ([Note](#))**Product Note** The mouse anti-human VEGF antibody specifically detects targets derived from human recombinant protein at various concentrations. Cross reactivity with mouse and rat are expected from sequence similarity.
