

Human FDA Standard Tissue Array slide

Cat. No. GTX21350
Application IHC-P, ISH

Species Human

Package

1 slide

PRODUCT

Summary

This FDA standard tissue array is suitable for meeting US FDA requirements for IHC (Immunohistochemistry) and IVD (In vitro Diagnostic Devices) certification and also European CE Mark. This tissue array has one slide which contains 30 different human normal tissue types and 3 donors per tissue type , and 41 the most popular human tumor tissue samples. FDA Standard Tissue Array

Tissue type Normal

APPLICATION

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution
Recommended dilution

IHC-P

Assay dependent

ISH

Assay dependent

Not tested in other applications.

PROPERTIES

Storage

Store Tissue Array at room temperature or 4°C.

Note

For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
