

PAP pen

Cat. No. GTX22601

Applications	IHC-P, IHC-Fr, ISH	Package 1 unit

PRODUCT	
Summary	PAP hydrophobic barrier pen for immunohistochemistry
Applications	

Application Note

The PAP pen is a special marking pen that provides a thin film-like green-tinged hydrophobic barrier when a circle is drawn around a specimen on a slide. This water repellent barrier keeps staining reagents localized on the tissue sections, prevents mixing of reagents when differentially staining two sections on the same slide, and allows use of less reagents per section. Insoluble in alcohol and acetone, PAP Pen markings can be optionally removed with xylene after the staining procedure is complete.PAP Pen is good for approximately 500 uses.

Properties	
Storage	Store at room temperature.
Note	For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.
11010	Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
