Human Brain: Temporal Lobe (Alzheimer's Disease) slides

Cat. No. GTX24587

Applications	IHC-P, ISH
Species	Human

Package
5 slide

PRODUCT

Summary	Single human neurological diseased tissue with 5 µm thickness is mounted on each positively charged glass slide. These tissue sections are designed for rapidly identifying cellular localization of genes or proteins in human Alzheimer, Parkinson's Disease, Dementia, Multiple Sclerosis, Progressive Supranuclear Palsy (PSP), and Depression diseased tissues. More organs maybe available upon request.
Tissue type	Neurological Disease

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
IHC-P	Assay dependent
ISH	Assay dependent

Not tested in other applications.

Properties

Storage	Cool dry at room temperature. 4ºC for long term storage.
Note	For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption. Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
