

L1210 (mouse lymphocytic leukemia) cell line slides

Cat. No. GTX25545

Application	ICC/IF
Species	Mouse

Package
5 slide

PRODUCT

L1210 (lymphocytic leukemia)

Summary

Mouse L1210 cells were cultured in DMEM and harvested at the log phase of growth. The L1210 cells were fixed in 4% paraformaldehyde and arrayed on a 12-well (5 mm) adhesive coated slide, with each well's surface specifically treated to enhance cellular attachment and to minimize background staining. Each well was loaded with approximately 7.5×10^3 L1210 cells. A follow-up heat dehydration process was done to ensure the attachment of L1210 cells and the stability of cellular proteins.

APPLICATION

Application Note

L1210 cell slide is provided for immunocytochemical analysis of protein and protein-protein interaction. Procedures for immunohistochemistry can be directly applied.

PROPERTIES

Storage Stable for up to 6 months at 4°C under desiccate conditions.

Note

For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
