

Human Parotid (Tumor) tissue lysate, Membrane Fraction

Cat. No. GTX27677

Species	Human	Package
		100 µg

PRODUCT

Summary	Human parotid tissue membrane protein lysate was prepared by isolating the membrane protein from whole tissue homogenates using a proprietary technique. The human parotid was frozen in liquid nitrogen immediately after excision and then stored at -70°C. For quality control purposes, the isolated parotid tissue membrane protein pattern on SDS-PAGE gel is shown to be consistent for each lot by visualization with coomassie blue staining.
Tissue type	Tumor

Properties

Form	Liquid
Buffer	HEPES, MgCl ₂ , KCl, EDTA, Sodium deoxycholate, Sucrose, NP-40, Glycerol, a cocktail of protease inhibitors
Preservative	No preservatives
Storage	Store as concentrated solution. Centrifuge briefly prior to opening vial. Aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Concentration	2 mg/ml (Please refer to the vial label for the specific concentration.)
Note	For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.
	Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
