PRODUCT

Summary

Iba1 antibody detects Iba1, a protein widely used by neuroscientists as a microglial marker and to gauge microglial activation. It is also expressed in macrophages. Discrimination between these two cell populations can be achieved via double staining with TMEM119 antibody (GTX134087), another useful microglia-specific marker, by identifying brain-residing microglia as Iba1+/TMEM119+ while CNS-infiltrating macrophages are Iba1+/TMEM119-.
