

## MED4 antibody

Cat. No. GTX31355

|              |                   |
|--------------|-------------------|
| Host         | Rabbit            |
| Clonality    | Polyclonal        |
| Isotype      | IgG               |
| Applications | WB, IHC-P, ELISA  |
| Reactivity   | Human, Mouse, Rat |

Package  
100 µg

## Applications

## Application Note

\*Optimal dilutions/concentrations should be determined by the researcher.

| Suggested dilution | Recommended dilution |
|--------------------|----------------------|
| WB                 | 0.5 µg/mL            |
| IHC-P              | 10 µg/mL             |
| ELISA              | Assay dependent      |

Not tested in other applications.

|               |                                                                                                        |
|---------------|--------------------------------------------------------------------------------------------------------|
| Calculated MW | 30 kDa. ( <a href="#">Note</a> )                                                                       |
| Product Note  | At least three isoforms of MED4 are known to exist; this antibody only recognizes the largest isoform. |

## Properties

|               |                                                                                                                                                                                                                            |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Form          | Liquid                                                                                                                                                                                                                     |
| Buffer        | PBS                                                                                                                                                                                                                        |
| Preservative  | 0.02% Sodium azide                                                                                                                                                                                                         |
| Storage       | Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles. |
| Concentration | 1 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                                                   |
| Immunogen     | MED4 antibody was raised against a 17 amino acid synthetic peptide from near the carboxy terminus of human MED4. The immunogen is located within the last 50 amino acids of MED4.                                          |
| Purification  | Purified by antigen-affinity chromatography                                                                                                                                                                                |
| Conjugation   | Unconjugated                                                                                                                                                                                                               |
