

## Helicobacter pylori 54kDa (flagellin) antibody [BDI461]

Cat. No. GTX42384

|              |                     |
|--------------|---------------------|
| Host         | Mouse               |
| Clonality    | Monoclonal          |
| Isotype      | IgG1                |
| Applications | WB, ICC/IF, ELISA   |
| Reactivity   | Helicobacter pylori |

Package  
500 µg

## Applications

## Application Note

\*Optimal dilutions/concentrations should be determined by the researcher.

| Suggested dilution | Recommended dilution |
|--------------------|----------------------|
| WB                 | Assay dependent      |
| ICC/IF             | Assay dependent      |
| ELISA              | Assay dependent      |

Not tested in other applications.

## Product Note

Reactive with the 54 kDa (flagellin) of H. pylori. Does not react in ELISA with C. jejuni, E. coli (mix), Salmonella (mix), Shigella (mix), P. aeruginosa, Yersinia and Citrobacter.

## Properties

|               |                                                                                         |
|---------------|-----------------------------------------------------------------------------------------|
| Form          | Liquid                                                                                  |
| Buffer        | PBS                                                                                     |
| Preservative  | 0.1% Sodium azide                                                                       |
| Storage       | Store as concentrated solution. Centrifuge briefly prior to opening vial. Store at 4°C. |
| Concentration | 4.50 mg/ml (Please refer to the vial label for the specific concentration.)             |
| Immunogen     | H. pylori (whole organism).                                                             |
| Purification  | Protein A purified                                                                      |
| Conjugation   | Unconjugated                                                                            |
