Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

| Suggested dilution | Recommended dilution |
|-----------------------------------|-----------------------------------------------------------------------|
| WB | 1:1000 |
| Not tested in other applications. | |
| Calculated MW | 46 kDa. (Note) |
| Product Note | It could both recognize pro-form caspase 9 and caspase 9 subunit p35. |

Properties

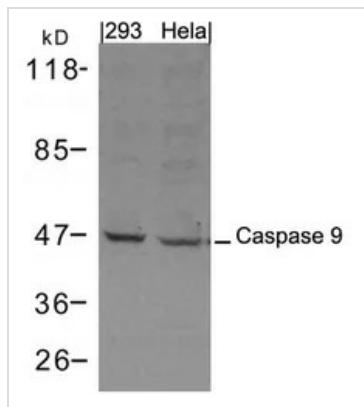

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Form | Liquid |
| Buffer | PBS, 150mM NaCl, 50% Glycerol |
