# CA19-9 ELISA kit

## Cat. No. GTX540620

| Applications | ELISA, Sandwich ELISA | Package<br>96 test |
|--------------|-----------------------|--------------------|
| Reactivity   | Species independent   |                    |

| PRODUCT      |  |
|--------------|--|
| Summary      | The GeneTex CA19-9 ELISA Kit is an in vitro assay tool for the quantitative measurement of CA19-9, with the lowest detectable concentration being 0.26 U/ml. Unlike the widely used CA19-9 antibody, this kit utilizes a Neu5Ac-specific antibody, GTX635389, that selectively targets CA19-9 without cross-reacting with CA19-9 analogs where Neu5Ac is replaced by Neu5Gc. |
| Applications |  |

### **Application Note**

The suitable sample types include cell culture supernatant, plasma and serum. The suggested sample loading amount is 50 µl per well. Please see the protocol for detailed procedure.

Assay range : Please refer to the protocol.

| Properties  |   |
|-------------|---|
| Storage     | The entire kit can be stored at 2-8°C for up to 6 months.   |
| Conjugation | Horseradish peroxidase(HRP)   |
| Note        | For In vitro laboratory use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption. |

### GTX540620 ELISA Image

A. Recovery assay was determined by spiking human CA19-9 at three levels throughout the assay range in the listed samples. B. To determine linearity, the listed samples were spiked with high level human CA19-9 and diluted with Sample Diluent CA1 in 1:2 and 1:4. The value was assessed by comparing it to undiluted samples.
