

Estrogen Receptor alpha antibody [GT9004]

Cat. No. GTX60340

Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Application	WB, IP, ELISA, ChIP assay, Gel supershift assays
Reactivity	Human, Mouse

Package
50 µl

APPLICATION

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
WB	Assay dependent
IP	Assay dependent
ELISA	Assay dependent
ChIP assay	Assay dependent
Gel supershift assays	Assay dependent
Not tested in other applications.	

Calculated MW 66 kDa. ([Note](#))

PROPERTIES

Form	Liquid
Buffer	Ascites
Preservative	0.05% Sodium azide
Storage	Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Immunogen	Human ER alpha (estrogen receptor alpha), using a synthetic peptide.
Purification	Unpurified
Conjugation	Unconjugated

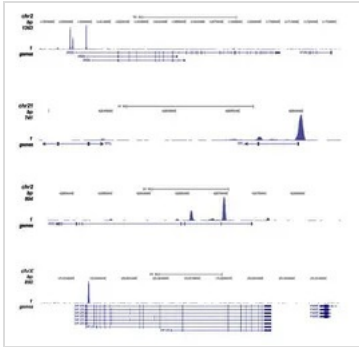

Note

For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.

DATA IMAGES

GTX60340 ChIP assay Image

ChIP analysis of sheared chromatin from MCF7 cells treated for 1 hour with estradiol using GTX60340 Estrogen Receptor alpha antibody [GT9004]. The IP'd DNA was analysed with an Illumina Genome Analyzer. Library preparation, cluster generation and sequencing were performed according to the manufacturer's instructions. The 36 bp tags were aligned to the human genome using the ELAND algorithm. This figure shows the obtained peaks near the TFF1 gene on chromosome 21 (figure 1A), the GREB1 and HAAO genes on chromosome 2 (figure 1B and C), and the ZNF185 gene on the X-chromosome (figure 1D).
