PRODUCT

Summary

KRAS has the distinction of being a preeminent oncoprotein as it is mutated in more than 85% of RAS-altered cancers. The RAS (G12D Mutant) antibody [HL10] is the first commercially available recombinant antibody that demonstrates exceptional specificity by paraffin-embedded immunohistochemistry and western blot for the RAS G12D mutant protein.

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
WB	1:500-1:3000
IHC-P	1:25-1:100

Note : Suggest using high sensitivity ECL for optimization. GTX14698 Trident femto Western HRP Substrate is recommended.

Not tested in other applications.

Observed MW (kDa) 22 kDa.

Product Note

Based on internal testing, this antibody specifically recognizes RAS G12D mutant and does not cross-react with wild-type RAS or the G12V, G12R, G12C, G12A, or G12S mutants.
