

## Hepatitis D virus Large delta protein antibody [HL1051]

## Cat. No. GTX636026

|              |                   |
|--------------|-------------------|
| Host         | Rabbit            |
| Clonality    | Monoclonal        |
| Isotype      | IgG               |
| Applications | WB, ICC/IF        |
| Reactivity   | Hepatitis D virus |

Package  
100 µl, 25 µl

## Applications

## Application Note

\*Optimal dilutions/concentrations should be determined by the researcher.

| Suggested dilution | Recommended dilution |
|--------------------|----------------------|
| WB                 | Assay dependent      |
| ICC/IF             | Assay dependent      |

Not tested in other applications.

## Properties

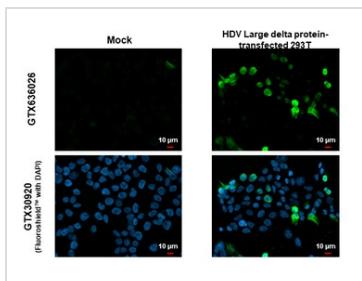

|               |                                                                                                                                                                                                                                  |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Form          | Liquid                                                                                                                                                                                                                           |
| Buffer        | PBS                                                                                                                                                                                                                              |
| Preservative  | No preservatives                                                                                                                                                                                                                 |
| Storage       | Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.       |
| Concentration | 1 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                                                         |
| Immunogen     | Carrier-protein conjugated synthetic peptide encompassing a sequence within the C-terminus region of Hepatitis D virus Large delta protein (Hepatitis delta virus genotype I (isolate D380)). The exact sequence is proprietary. |
| Purification  | Affinity purified by Protein A.                                                                                                                                                                                                  |
| Conjugation   | Unconjugated                                                                                                                                                                                                                     |
| Note          | For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.                                                                                |
|               | Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.                                                      |

## DATA IMAGES

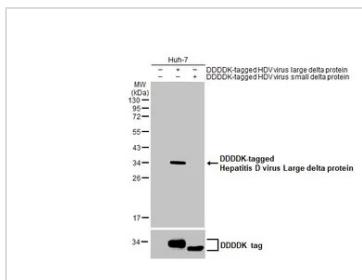

## GTX636026 ICC/IF Image

Hepatitis D virus Large delta protein antibody [HL1051] detects Hepatitis D virus Large delta protein protein by immunofluorescent analysis.

Sample: Mock and transfected 293T cells were fixed in 4% paraformaldehyde at RT for 15 min.

Green: Hepatitis D virus Large delta protein stained by Hepatitis D virus Large delta protein antibody [HL1051] (GTX636026) diluted at 1:500.  
Blue: Fluoroshield with DAPI (GTX30920).

## GTX636026 WB Image

Non-transfected (-) and transfected (+) Huh-7 whole cell extracts (30 μg) were separated by 12% SDS-PAGE, and the membrane was blotted with Hepatitis D virus Large delta protein antibody [HL1051] (GTX636026) diluted at 1:5000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody.
