

Avian Influenza A virus H5N8 HA (Hemagglutinin) antibody [HL1550]

Cat. No. GTX637025

Host	Rabbit
Clonality	Monoclonal
Isotype	IgG
Applications	WB, ELISA, IHC-P (cell pellet)
Reactivity	Avian Influenza A virus

Package

100 µl, 25 µl

Applications

Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
WB	Assay dependent
ELISA	Assay dependent
IHC-P (cell pellet)	Assay dependent

Not tested in other applications.

Product Note

This antibody is specific for Avian Influenza A virus H5N8 HA protein, and it does not cross-react with HA protein of Influenza A virus H1N1 and H3N2, Avian Influenza A virus H5N1, H5N3, H7N7, H9N2, and H10N3, and Influenza B virus. The immunogen shares over 95% identity with HA protein of H5N1 clade 2.3.4.4b.

Properties

Form	Liquid
Buffer	PBS
Preservative	No preservatives
Storage	Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Concentration	1 mg/ml (Please refer to the vial label for the specific concentration.)
Immunogen	Recombinant protein encompassing a sequence within the center region of Influenza A virus H5N8 HA (Hemagglutinin) (A/Astrakhan/3212/2020)). The exact sequence is proprietary.
Purification	Affinity purified by Protein A.
Conjugation	Unconjugated

For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

Note
Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.

DATA IMAGES

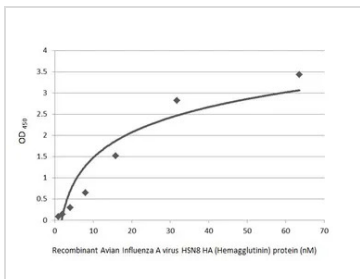

GTX637025 IHC-P (cell pellet) Image

Avian Influenza A virus H5N8 HA (Hemagglutinin) antibody [HL1550] detects Avian Influenza A virus H5N8 HA (Hemagglutinin) protein at cytoplasm by immunohistochemical analysis. Sample: Paraffin-embedded mock and Avian Influenza A virus H5N8 HA - transfected 293T cell pellet. Green: Avian Influenza A virus H5N8 HA (Hemagglutinin) stained by Avian Influenza A virus H5N8 HA (Hemagglutinin) antibody [HL1550] (GTX637025) diluted at 1:1000. Blue: Fluoroshield with DAPI (GTX30920). Antigen Retrieval: Citrate buffer, pH 6.0, 15 min

GTX637025 WB Image

Non-transfected and transfected 293T whole cell extracts were separated by 7.5% SDS-PAGE, and the membrane was blotted with Avian Influenza A virus H5N8 HA (Hemagglutinin) antibody [HL1550] (GTX637025) diluted at 1:5000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody.

GTX637025 ELISA Image

Indirect ELISA analysis was performed by coating the plate with recombinant HEK293 expressed, full-length Avian Influenza A virus H5N8 HA (Hemagglutinin) protein (63.49-0.99 nM). Coated protein was probed with Avian Influenza A virus H5N8 HA (Hemagglutinin) antibody [HL1550] (GTX637025) (1 µg/mL). Goat anti-rabbit IgG antibody (HRP) (GTX213110-01) (1:10000) was used to detect the bound primary antibody.

GTX637025 WB Image

Non-transfected (-) and transfected (+) 293T whole cell extracts (30 µg) were separated by 7.5% SDS-PAGE, and the membrane was blotted with Avian Influenza A virus H5N8 HA (Hemagglutinin) antibody [HL1550] (GTX637025) diluted at 1:100000. The HRP-conjugated anti-rabbit IgG antibody (GTX213110-01) was used to detect the primary antibody.
