

Varicella Zoster virus gH antibody [OAKK39]

Cat. No. GTX64188

Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Applications	ICC/IF, IP, Neutralizing /Inhibition
Reactivity	Varicella Zoster virus

Package
100 µg

Applications

Application Note

Immunofluorescence staining and Immunocytochemistry (1:1,000)

Product Note Reacts with gH of VZV

Properties

Form	Liquid
Buffer	Filter-sterilized PBS, 50% Glycerol
Preservative	No preservatives
Storage	Store as concentrated solution. Centrifuge briefly prior to opening vial. For short-term storage (1-2 weeks), store at 4°C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Concentration	Batch dependent (Please refer to the vial label for the specific concentration.)
Immunogen	Varicella-zoster virus Oka vaccine strain
Conjugation	Unconjugated

Note

For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.

DATA IMAGES

GTX64188 ICC/IF Image

Immunofluorescence staining of VZV glycoprotein H in VZV-infected MRC-5 cells by using anti-VZV gH antibody (clone OAKK39). MRC-5 was infected with VZV pOka strain, vaccine strain vOka or mock-infected. Anti-VZV gH antibody was used at about 1/1,000 dilution. As second antibody, Alexa Fluor 488 donkey anti-mouse IgG [H+L] was used at 1/200 dilution. Nuclei were stained with Hoechst 33342.
