## Applications

### Application Note

For IHC, a recommended protocol is provided. For WB: Use at a concentration of 1-5 µg/ml. For ChIP: Use at an dependent assay. Optimal dilutions/concentrations should be determined by the researcher.

**Calculated MW** 59 kDa. ( [Note](#) )

### Product Note

Strong Erb staining in epithelial cell nuclei. Occasional weak to moderate staining is seen in surrounding stromal and endothelial cell nuclei. Sporadic light cytoplasmic staining is sometimes observed. We have also successfully detected ERb in colon and ovarian tumors using the same antibody. KO/KD validation is based on published data (PMID: 27323858).

Non-transfected (–) and transfected (+) 293T whole cell extracts (30 µg) were separated by 7.5% SDS-PAGE, and the membrane was blotted with Estrogen Receptor beta antibody [14C8] (GTx70174) diluted at 1:5000. The HRP-conjugated anti-mouse IgG antibody (GTx213111-01) was used to detect the primary antibody.
