## PRODUCT

### Summary

p53 antibody recognizes p53 protein, which has a predicted molecular weight of 44 kDa but is typically detected by western blot at 53 kDa. p53, known widely as a tumor suppressor, plays critical roles in various cellular processes including cell cycle regulation, DNA repair, and apoptosis. p53 is mutated in many human cancers.

### Applications

### Application Note

\*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution	Recommended dilution
WB	1:500-1:10000
ICC/IF	Assay dependent
IHC-P	1:1000
IHC-Fr	Assay dependent
FCM	Assay dependent
IP	1:100-1:500
ELISA	Assay dependent

**Note : Antigen retrieval can be done with EDTA at pH8.0 - Some customers have stated that the product works well without antigen retrieval.**

Not tested in other applications.
