

Streptavidin (AP)

Cat. No. GTX85909
Applications

WB, ELISA, IHC

Package

500 µl

PRODUCT
Summary

Streptavidin is a 55 kDa (subunit MW 14 kDa) biotin-binding protein isolated from Streptomyces avidini. Streptavidin is superior to avidin, because it does not contain carbohydrate like avidin and has no net charge at neutral pH. Streptavidin~biotin system is routinely used in Immunohistochemistry (IHC). Extinction Coefficient 1% A280=32.0; Protein content: > 95%; Alkaline Phosphatase (ALP) used in this conjugation is 140 KDa enzyme purified from calf intestine.

Applications
Application Note

*Optimal dilutions/concentrations should be determined by the researcher.

Suggested dilution
Recommended dilution

WB Assay dependent

ELISA Assay dependent

IHC Assay dependent

Not tested in other applications.

Properties
Form Liquid

Buffer 10mM Tris-HCl, 200mM NaCl, 10 mg BSA, 50% Glycerol

Preservative 0.05% Sodium azide

Storage Store as concentrated solution. Centrifuge briefly prior to opening vial. Store at 4°C. DO NOT FREEZE. Protect from light.

Conjugation Alkaline Phosphatase (AP)

Note

For laboratory research use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.

Purchasers shall not, and agree not to enable third parties to, analyze, copy, reverse engineer or otherwise attempt to determine the structure or sequence of the product.
